## 1. Operating Results

### (1) Overview

In the fiscal period under review (the six-month period from Apr 1, 2021 to Sept 30, 2021, hereinafter the “first half”), although the global spread of the coronavirus continued to remain, there were signs of the economic recovery due to wide availability of vaccines mainly in developed countries. In Japan as well, the economy continued to be impacted by the spread of the coronavirus but signs of recovery were visible mainly in the manufacturing sector, as the vaccination has expanded. On the other hand, the economy suffered increase of crude oil prices and deceleration of automotive production, which must be carefully monitored.

The Mitsui Chemicals Group (hereafter “the Group”) reported the following operating results for the first half as follows. The Group has applied operating income before special items as a management indicator, which is operating income excluding non-recurring items.

(Billions of Yen)

	Sales Revenue	Operating Income before Special Items	Operating Income	Net Income Attributable to Owners of the Parent
First half	743.5	94.3	94.5	73.9
Same period of previous fiscal year	537.0	18.6	17.9	9.6
Difference	206.5	75.7	76.6	64.3
Ratio (%)	38.5	407.6	427.9	670.1

**Sales revenue** increased 206.5 billion yen, or 38.5%, compared with the corresponding period of the previous fiscal year to 743.5 billion yen. This was mainly attributable to increase in sales prices due to higher naphtha and other raw materials and fuel prices, in addition to higher sales volume in each segment as economic activities have resumed.

**Operating income before special items** was 94.3 billion yen, an increase of 75.7 billion yen or 407.6% year on year. This result was due to favorable terms of trade as a result of higher overseas market prices of Bisphenol A, in addition to higher sales volume in each segment and improved share of profit (loss) of investments accounted for using equity method.

**Operating income** was 94.5 billion yen, increased 76.6 billion yen or 427.9% year on year. This result was mainly due to the increase of operating income before special items.

**Financial income/expenses** improved 0.1 billion yen year on year to 2.1 billion yen loss, due to improved foreign exchange gains and losses, although reversal of allowance for doubtful accounts in the corresponding period of the previous fiscal year was no longer booked.

As a result of the aforementioned factors, **income before income taxes** amounted to 92.4 billion yen, an increase of 76.7 billion yen or 486.5% year on year.

**Net income attributable to owners of the parent** after accounting for income taxes and non-controlling interests was 73.9 billion yen, an increase of 64.3 billion yen or 670.1% compared with the corresponding period of the previous fiscal year. Basic earnings per share for the period were 377.64 yen.
